Chord Cadenza technical Information

Chord Cadenza

CONDUCTORS: Pseudo-balanced 18 AWG multi-stranded, silver-plated oxygen free copper conductors. Matched signal and return conductors improve sound quality

CONFIGURATION: Signal and return conductors arranged in noise cancelling twisted pair configuration

CONDUCTOR INSULATION: PTFE. We believe that to obtain the most neutral tonal characteristic from silver-plated conductors it is vital to use PTFE insulation. The insulated conductors are held in place with an extruded PVC jacket to prevent unwanted mechanical noise.

SHIELDING: Dual layer; high density, 100% coverage, braided oxygen free copper shield and overlapped foil shield

JACKET: Conductors and shields surrounded with low density PVC jacket to minimise mechanical noise. Braided outer jacket

COLOUR: Blue

TERMINATIONS: Fitted with new Chord VEE Plugs. A high performance RCA (phono) plug with vibration eliminating ABS enclosure. PTFE insulated centre pin, low mass signal return surround. Non compression clamping system reduces potential signal corruption. Silver-plated contact areas maintain single material signal path. Also available fitted with Din and XLR plugs. Custom terminations available. Chord VEE plug uses a unique ABS enclosure to surround a low mass gold or silver-plated centre pin and signal return. A special non-compression cable clamp is also employed. The VEE plug has a profound effect on the performance of all the cables it is fitted to. Detail and definition are enhanced and pace, rhythm and timing improved.

The Cadenza is a hugely versatile interconnect, working outstandingly well in a wide variety of systems, The heavy gauge silver-plated conductors bring real vitality and exuberance along with high levels of detail. The twisted pair configuration conductors are silver-plated and insulated with PTFE, before being shielded by a heavy gauge, high density, foil and braid shielding system, that in turn is surrounded by a vibration-damping outer jacket. Cadenza is fitted with Chord VEE PTFE insulated RCA plugs but the geometry of the cable means that Cadenza also performs outstandingly well when terminated with XLR or DIN plugs. Cadenza will help your music to sound bold, dynamic, exciting and above all will make your music passionate and involving
